# Arsh Kaushik

Product Designer & Engineer | Enterprise & Consumer UX | Design  
+ Strategy + Code | Agentic Design  
New York, New York, United States

## Summary

I'm a product designer & engineer with 4+ years of experience. I think in systems, prototype in code, and default to asking "why does this feel hard for the user" before touching Figma. I care about design that holds up under pressure. The kind that works in messy startups and enterprise environments, adapts to real user behavior, and doesn't fall apart when the edge cases show up. Outside of work: reading, cafe-hopping, photography, and trying to find the limits of whatever AI I'm currently poking at. Always up for a conversation about design, AI, psychology, or what's broken in the products we all use every day. Feel free to connect.

---

## Experience

### Wikimedia Foundation

Product Designer | Accessibility  
March 2026 - May 2026 (3 months)  
New York, NY

### United Nations

UX Researcher  
January 2026 - May 2026 (5 months)  
New York, NY

### Medlaunch Concepts

Product Designer  
October 2025 - December 2025 (3 months)  
New York, NY

### Precisely

1 year 5 months

### Experience Engineer

April 2025 - August 2025 (5 months)

UX Designer | Data Configuration  
March 2025 - August 2025 (6 months)

UX Designer | Design System  
April 2024 - July 2025 (1 year 4 months)

UX Designer | Data Enrichment  
October 2024 - March 2025 (6 months)

DWA  
Product Designer  
April 2023 - April 2024 (1 year 1 month)

Aspora  
Product Design Consultant  
November 2023 - December 2023 (2 months)  
Bengaluru

Newton School  
Product Designer  
January 2023 - March 2023 (3 months)  
Bengaluru, Karnataka, India

- Crafted immersive learning journeys for emerging software engineers from India's Tier 2 and Tier 3 cities.
- Identified critical issues in the lecture repository by collaborating with the PI team, scrutinising the past 30 days' results from Microsoft Clarity, & conducting a UX audit & then devised a solution to improve students' lecture browsing experience by incorporating dynamic thumbnails, level-I naming, progress indicator, etc. Also defined the metrics & funnels to measure the success of this enhanced experience.
- Led the interaction design of the launch of the Goa Bootcamp Event (in collaboration with the Govt. of Goa), launched by the Chief Minister of Goa in front of 5000 spectators.
- Contributed to the Prism icon set of 130+ icons in the Gravity design system by designing 28 icons, defined their negation states, finalised stroke width & corner radius, & meticulously tested the icons with overall UI style & typeface for seamless integration & consistency.
- Collaborated with fellow designers to define the brand's perception, tone of voice, and visual communication to establish a cohesive brand experience.

Scaler

## Product Designer

February 2022 - May 2022 (4 months)

Bengaluru, Karnataka, India

- Validated hypothesis of poor entrance test experience on mobile-web by collecting insights from the CX team & the head of growth and then designed a solution along with visual refinements in order to decrease interaction cost & 80% drop-off. The solution was ranked 3rd in the office hackathon.
- Migrated designs from Adobe XD to Figma and arranged them according to 8 px grid & new design system changes, along with updating them on Zeplin to keep the engineers updated with the latest designs.
- Conducted visual audit of Scaler US & India landing page and reported to the senior designer with possible adjustments. Also conducted the audit of various input fields present across the Scaler products & InterviewBit to create components for the design system.

## Offcampus

Product Designer | W21

September 2021 - March 2022 (7 months)

## Zomato

Product Designer

September 2021 - January 2022 (5 months)

Gurugram, Haryana, India

- Worked in the Fitso product team to craft simple, intuitive, & delightful experiences for Masterkey & Academy offerings.
- Implemented outside & inside-product onboarding with consistent design & humane conversational tone for web and app both along with the flexibility to use social logins to reduce 60% drop-off rate resulting in faster logins & more user acquisitions. Special attention was paid to UX writing & GIFs/Images to communicate what Fitso as a brand has to offer, along with collecting data of intent-to-come.
- Enhanced slot booking experience by conducting visual audit & usability testing to pinpoint critical issues in order to reduce 40% drop-off rates along with re-positioning post-booking information to communicate details with a confirmation to reduce cancellations. Also designed a new-slot generation animation to communicate date & time change after 12 AM.
- Collaborated with the product manager & design lead to discuss new features & user retention strategies to increase NPS.

## Apni Kaksha

## UI/UX Designer

September 2021 - November 2021 (3 months)

New Delhi, Delhi, India

## DotReview

### UI/UX Designer

July 2021 - August 2021 (2 months)

Gurugram, Haryana, India

- Led the UX/UI design of an early-stage startup connecting founders and investors at one place and help them review each other to proceed with fundings
- Enhanced UX & user journey to make the site more user-friendly & assisted engineers in frontend development
- Provided low and hi-fidelity designs and participated in quality assurance sessions with the product lead & software engineers to oversee the implementation of the intended user experience

## Cartoon Mango

### Product Designer

May 2021 - August 2021 (4 months)

Bengaluru, Karnataka, India

- Worked in close collaboration with two fellow designers to build a Royal Canadian Mounted Police (RCMP) accredited fingerprinting agency by designing a fluid experience & user journey of creation, updation, submission, & de-identification of Govt. documents for the current & former Canadian residents/citizens.
- Worked closely with the design lead to redesign the company's official website using unusual layouts and implementing new color & font styles to attract new clients & compete with top Indian design studios.

## GFG SRMUH

### Lead Designer - Graphics

February 2021 - July 2021 (6 months)

Sonapat, Haryana, India

## Upwork

### Product Designer

April 2021 - June 2021 (3 months)

- Worked for a UAE based Indian client to design an MVP of a fantasy sports app for 3.5M Emirati sports fan

- Implemented aesthetically pleasing neumorphic design to pitch Arab investors

## SRM One

### Product & Design Lead

September 2020 - May 2021 (9 months)

Sonapat, Haryana, India

- Designed a website to deliver free learning resources to ~1000 CS undergrads
- Assisted flutter and web developers in the development & planned product scalability to integrate more features
- Led daily team stand-ups, moderate weekly project showcases, & offer managerial guidance to 2 full-stack developers

## AT&T

### Summer Extern

June 2020 - July 2020 (2 months)

- Experience and exposure to business professional skills
- Gained knowledge about AI/ML, investor relations, personal branding & design process
- Opportunity to learn from speakers like Mark Cuban, Stedman Graham, Molly Bloom & General Thomas Kolditz

---

## Education

### Pratt Institute

MS, Information Experience Design · (August 2025 - May 2027)
